Hosted IR vs IaaS
Frameworks

1

Custom Activities – A .Net Console App Executed Using Azure Batch Service

VM node size set per compute pool:

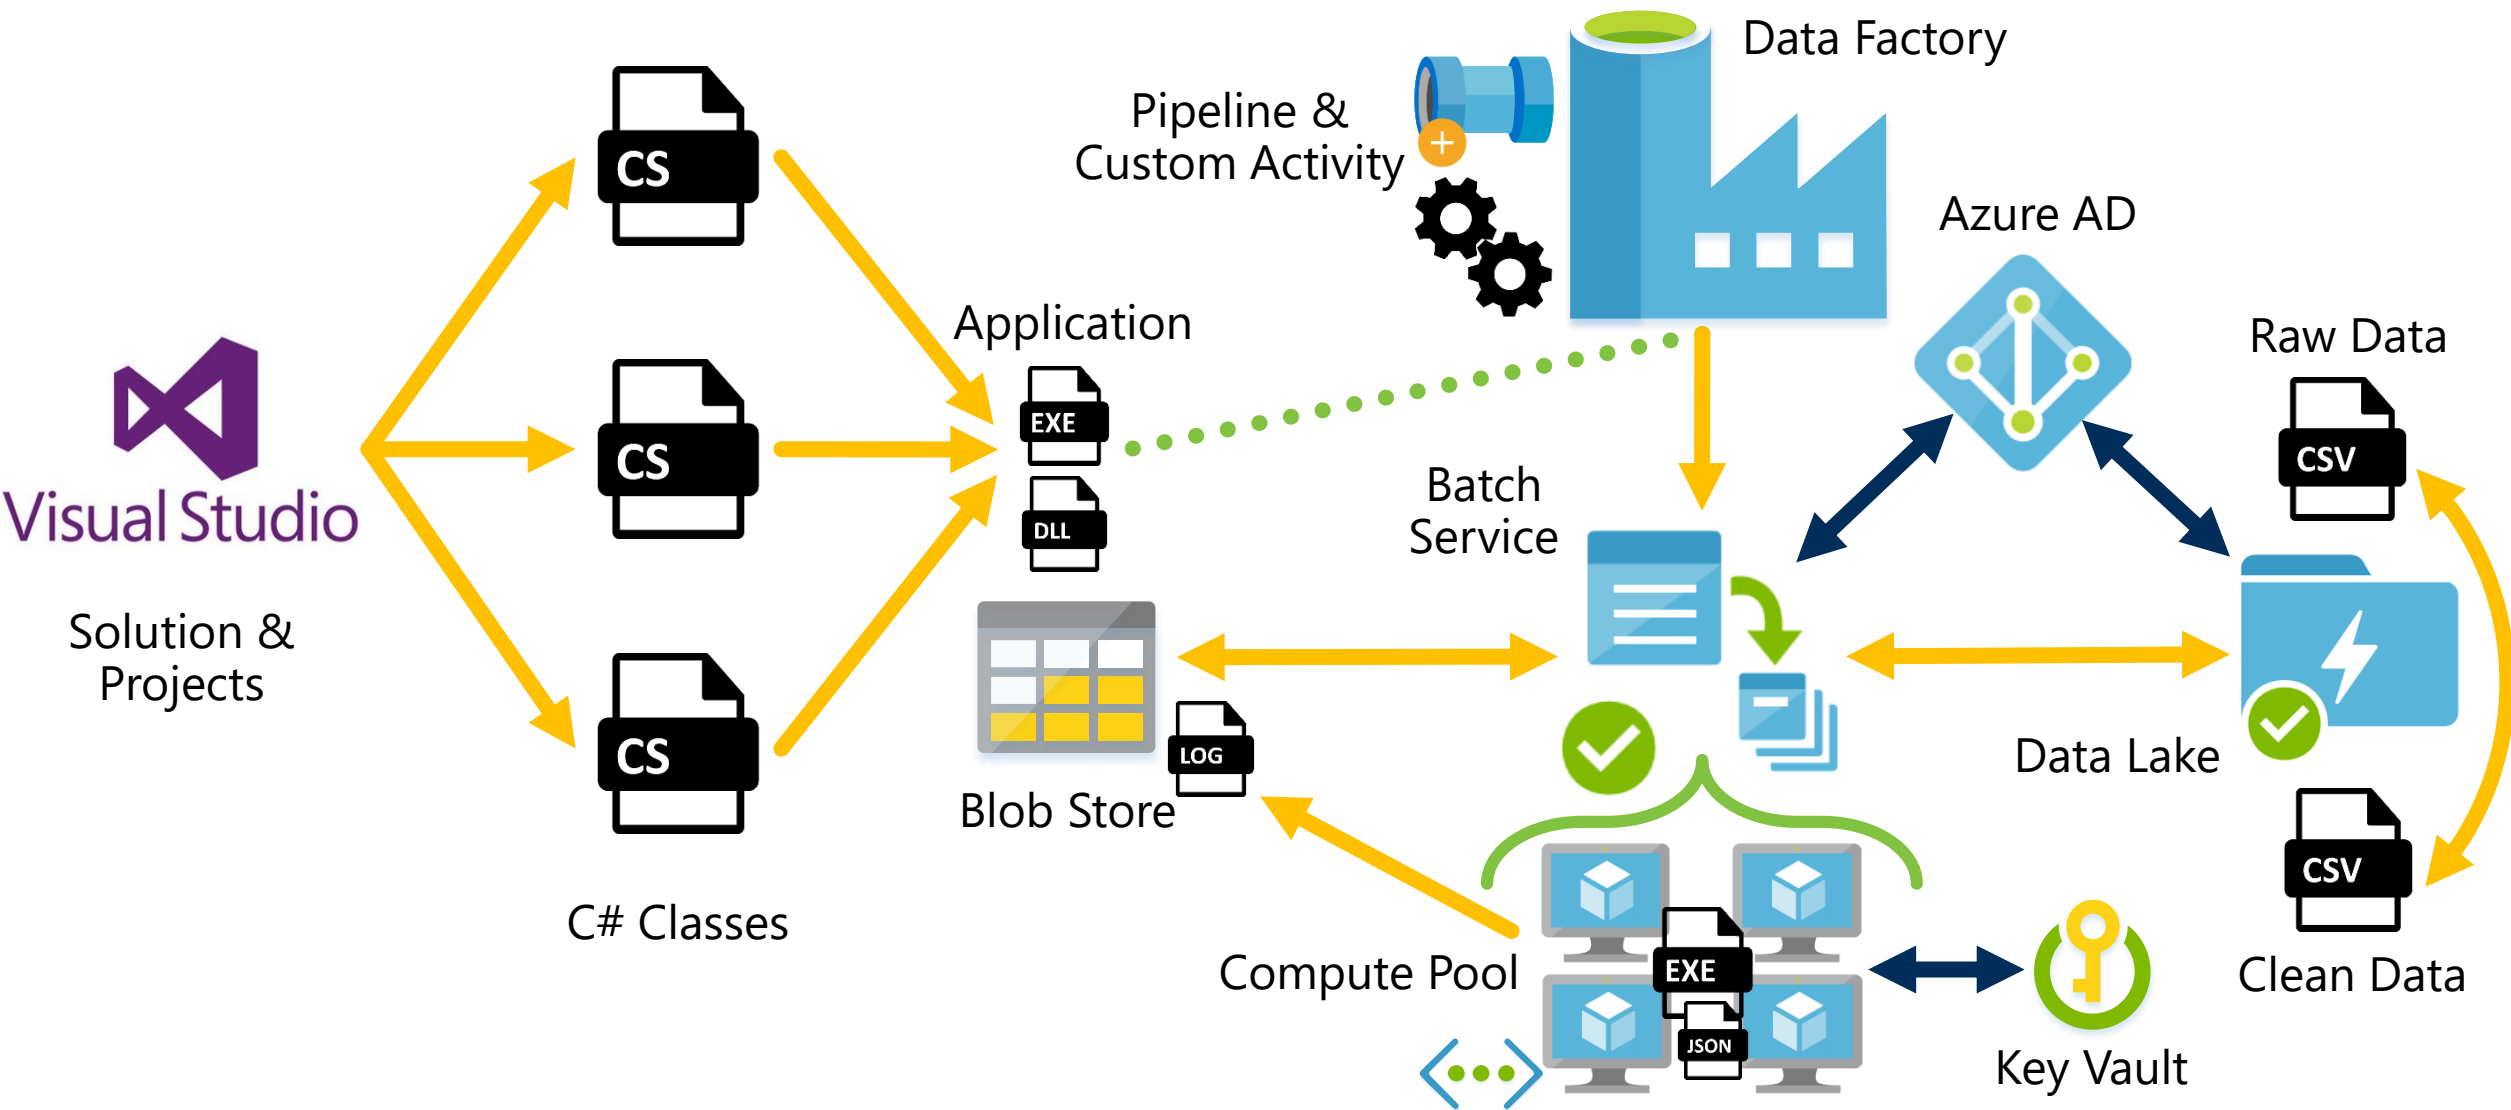

A1 Standard ★	A2 Standard ★	A3 Standard ★
1 Cores	2 Cores	4 Cores
1.8 GB	3.5 GB	7 GB
1 TB OS disk size	1 TB OS disk size	1 TB OS disk size
70 GB Resource disk size	135 GB Resource disk size	285 GB Resource disk size
2 Max data disk	4 Max data disk	8 Max data disk
Unable to display pricing	Unable to display pricing	Unable to display pricing

- ▶ 1 compute node = 1 virtual machine.
- ▶ 1 job per compute node.
- ▶ Max of 4 tasks per node.
- ▶ OS on D drive, not C.
- ▶ Special environment variables.

Custom Activities – A .Net Console App Executed Using Azure Batch Service

ADF Extensibility Continued

1 **Custom Activities** – A .Net Console App Executed Using Azure Batch Service

2 **Rest API Calls** – Eg. Web Activities Calling:

Azure Functions
Azure Logic Apps
Azure Automation

General Settings² Parameters Advanced

Name * Web1

Description

Timeout 7.00:00:00

Retry 0

Retry interval 20

General Settings² Parameters Advanced

URL *

Method * Select API method...
Select API method...
GET
POST
PUT

Headers

General Settings² Parameters Advanced

Use [expressions](#), [functions](#) or refer to [system variables](#) in the 'value' column.

Parameterizable properties ⓘ

NAME	VALUE
url	<input type="text" value="Value"/>
body	<input type="text" value="Value"/>
Timeout	<input type="text" value="Value"/>
Retry	<input type="text" value="Value"/>

ADF Extensibility Continued

- 1 **Custom Activities**
- 2 **Rest API Calls**
- 3 **SSIS** – Packages with Control Flows and Data Flows

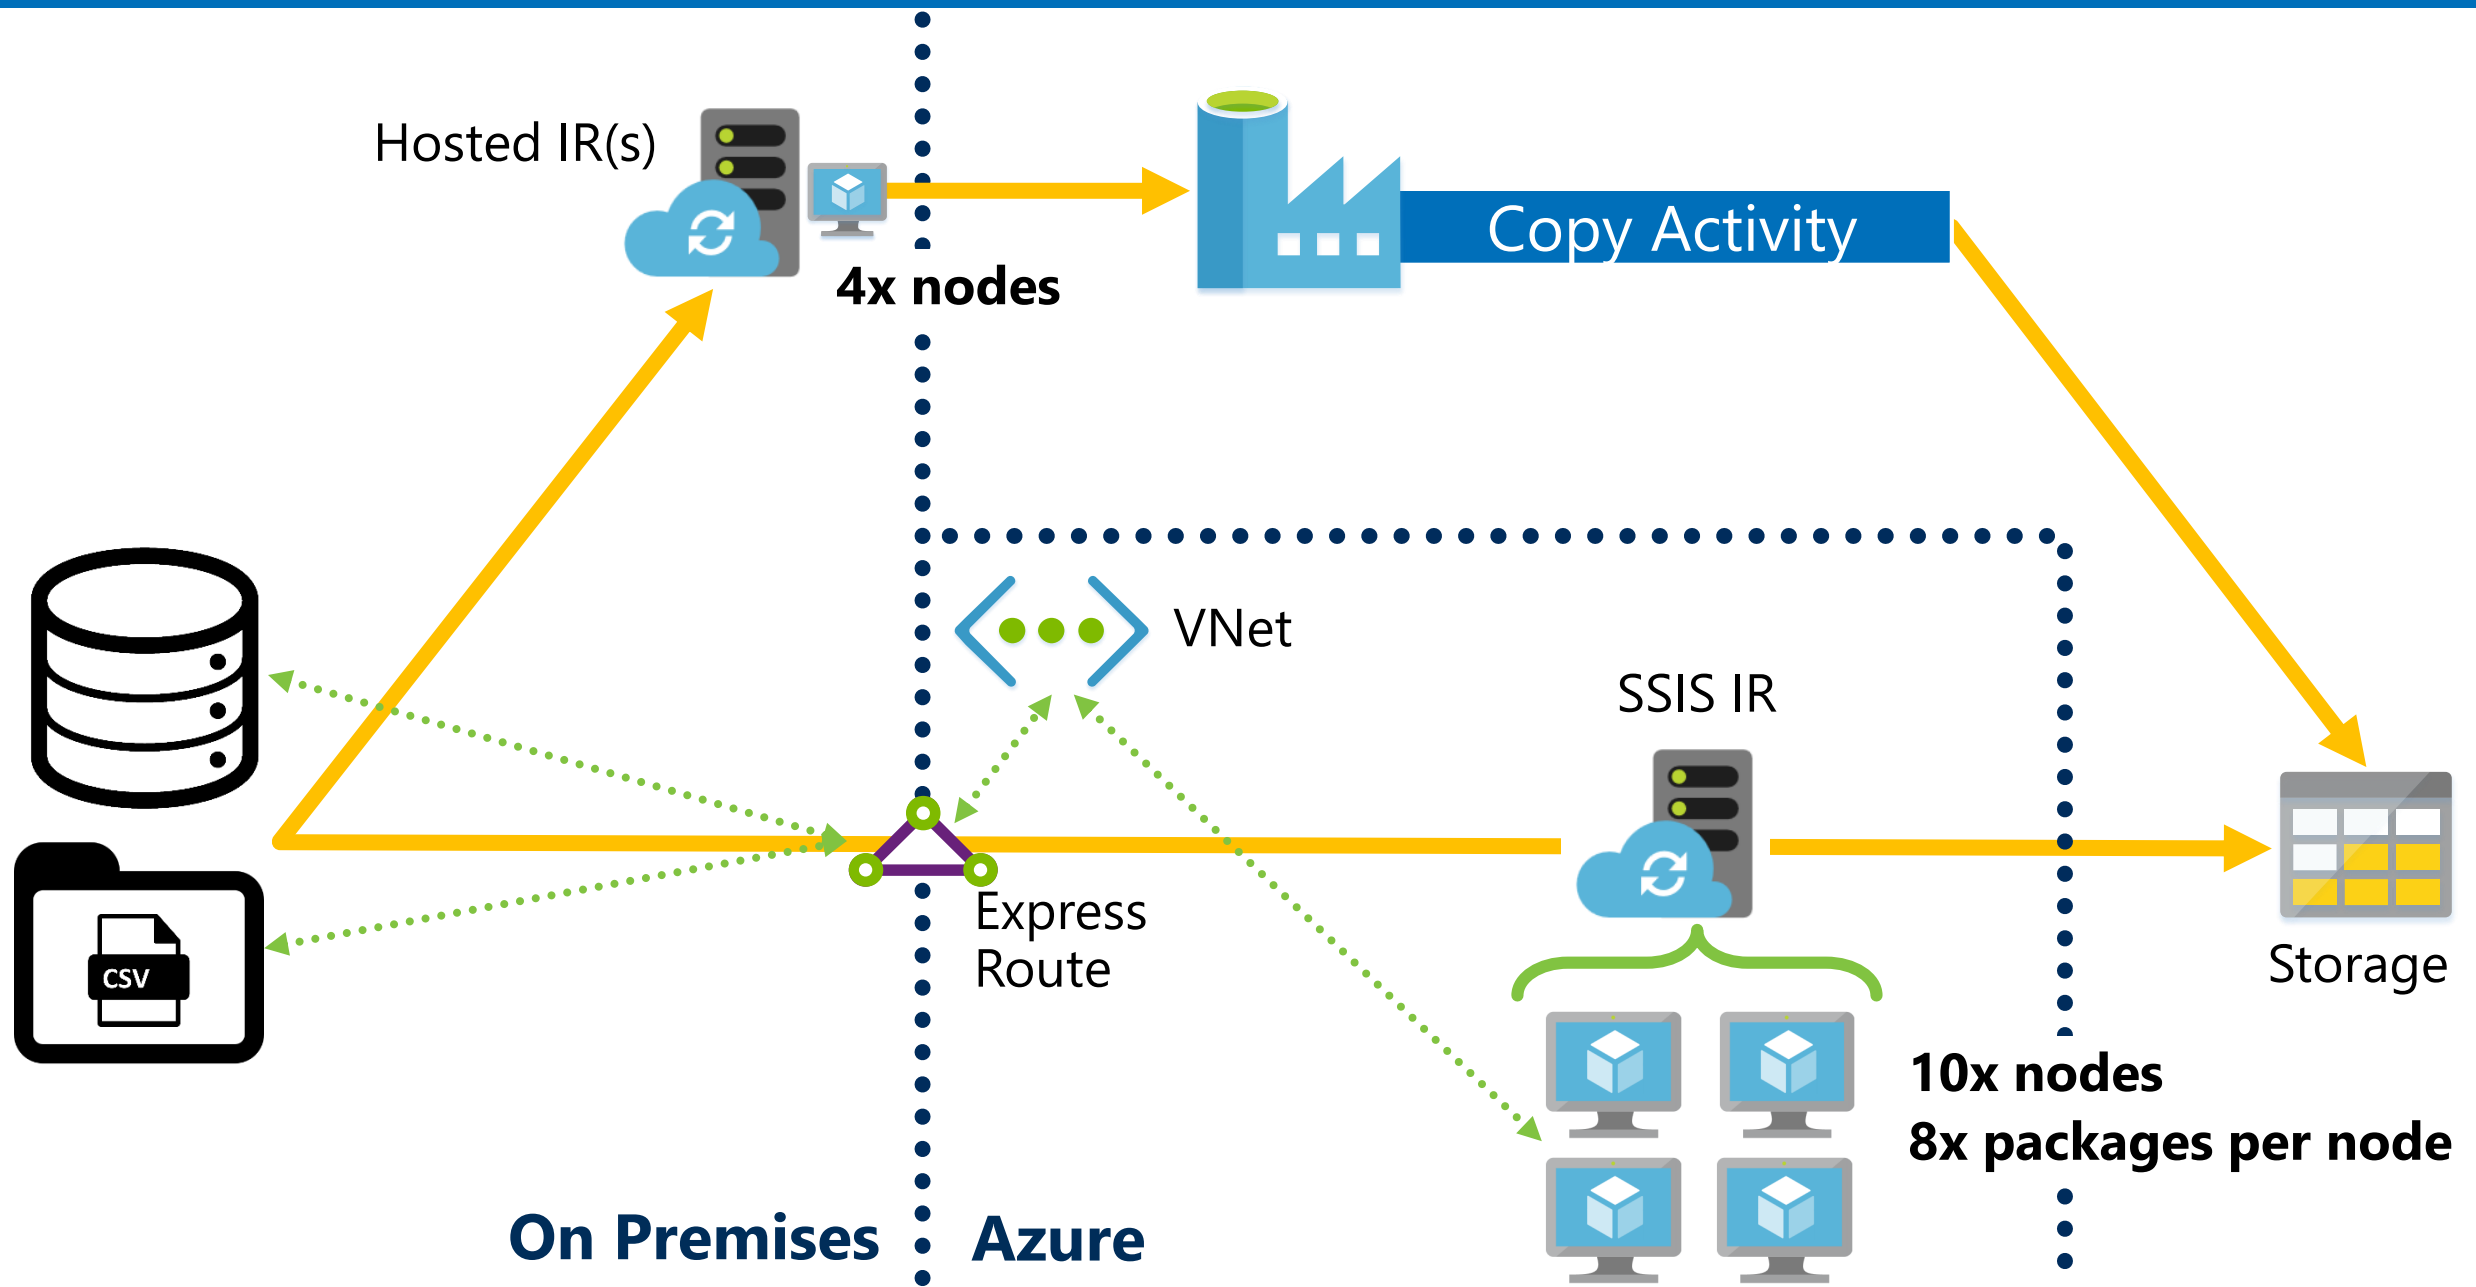

ADF SSIS IR
